UNITED STATES RECOURSE TO ARTICLE XXIII WITH REGARD TO FRENCH IMPORT RESTRICTIONS

Note by the United States Delegation

1. The Government of the United States is requesting that the CONTRACTING PARTIES consider pursuant to paragraph 2 of Article XXIII of the General Agreement import restrictions applied by the Government of France to products on which the European Economic Community has given tariff concessions to the United States in the recently concluded negotiations under the GATT.
2. The United States considers that these restrictions impair or nullify tariff concessions recently negotiated between the United States and the EEC within the meaning of Article XXIII. The United States considers also that these restrictions are applied in contravention of Article XI of the General Agreement, and hence deny to affected United States exporters the benefits of the General Agreement.
3. The attached annex contains a list of the products subject to restrictions on being imported into France from the United States, and on which the European Economic Community has given tariff concessions to the United States. France has notified these restrictions to the GATT secretariat. They appear in document L/1764 of 29 May 1962.
4. In several important cases the import restrictions have the effect of practically embargoing imports from the United States. In three cases the restrictions discriminate de jure against trade from the dollar area. In other cases, there is de facto discrimination since imports are admitted from other countries but prohibited from the United States.
5. The restrictions complained of have been carried forward from the period prior to June 1960, when the Government of France ceased to apply import restrictions for balance-of-payments reasons. In the interval since June 1960

the Government of the United States has made numerous bilateral representations seeking the relaxation of remaining import restrictions and, together with other interested contracting parties, consulted with the Government of France concerning import restrictions at Geneva, 4-6 April 1961 under paragraph 1 of Article XXII.

6. The United States Government considers that import restrictions applied by France are among those applied without authorization under the General Agreement. Accordingly, the United States Government made written representations to the Government of France on 3 May 1962, pursuant to the provisions of paragraph 1 of Article XXIII, asking about plans for the removal of import restrictions on products shown in the Annex. Satisfactory adjustment of the problem was not reached as a result of the written representations.

7. Accordingly the United States Government is requesting that the CONTRACTING PARTIES consider this matter pursuant to paragraph 2 of Article XXIII, and that they make appropriate findings under the Agreement.
